RANKPROMPT · AI VISIBILITY AUDIT

Silent Conference — City-by-City AI Visibility Audit

How often AI assistants recommend Quiet Events for silent-conference equipment across 10 major U.S. conference cities — the categories, the citations, and why we win some markets and not others.

Quiet Events · 10 cities · 12 prompts × 8 AI platforms · generated 2026-06-09

#5

Quiet Events' rank of 967
brands named

5.6%

own-site citation share
(vs competitors' city
pages)

10/10

city pages already exist
— but underperform

2

markets where the page
earns 0 citations (LV,
NYC)

What we measured

We asked the same 12 buyer-intent prompts about **silent-conference** equipment in each of 10 major U.S. conference cities, on 8 AI assistants — **12 prompts × 8 platforms × 10 cities = 960 answers**. The prompts are grouped into 5 categories so we can see which *kind* of question surfaces Quiet Events vs competitors.

CATEGORY	PROMPT (ASKED PER CITY, WITH {CITY} FILLED IN)
Discovery	silent conference equipment rental {city}
	where to rent wireless headphones for a conference in {city}
	conference headphone rental companies in {city}
Best & Ranking	best silent conference equipment rental company in {city}
	top wireless headphone rental vendors for corporate events in {city}
Use Case	multi-channel headphone rental for breakout sessions in {city}
	simultaneous interpretation and translation headset rental in {city}
	silent seminar headphone rental for a corporate event in {city}
Scale & Convention	headphone rental for a large convention in {city}
	silent conference system for 500+ attendees in {city}
Informational	how much does it cost to rent silent conference headphones in {city}
	what equipment do I need for a silent conference in {city}

Cities: Orlando · Las Vegas · Chicago · Atlanta · San Diego · New York · Washington DC · Dallas · Miami · Denver. **Platforms:** ChatGPT, ChatGPT Search, Perplexity, Google AI Overviews, Claude, Claude Search, Gemini, Grok. **Visibility** = the share of a city's 96 answers (12 prompts × 8 platforms) that cite Quiet Events.

Visibility by city — how often we're mentioned

Visibility = the share of a city's 96 answers (12 prompts × 8 platforms) that mention Quiet Events at all. It measures whether AI *name-drops* the brand — not whether it cites our website. The per-category columns show the same appear-rate within each prompt group.

CITY	VISIBILITY	ANSWERS CITING	DISC.	BEST	USE CASE	SCALE	INFO
New York, NY	54.2	52/96	62%	69%	42%	56%	44%
San Diego, CA	40.6	39/96	46%	31%	42%	56%	25%
Las Vegas, NV	36.5	35/96	33%	38%	38%	38%	38%
Orlando, FL	34.4	33/96	29%	31%	12%	62%	50%
Miami, FL	32.3	31/96	29%	44%	21%	44%	31%
Chicago, IL	31.2	30/96	21%	31%	25%	56%	31%
Atlanta, GA	21.9	21/96	21%	25%	21%	25%	19%
Washington, DC	21.9	21/96	12%	31%	17%	25%	31%
Dallas, TX	21.9	21/96	25%	44%	12%	19%	12%
Denver, CO	11.5	11/96	8%	19%	8%	6%	19%

Results — per category, per city

Appear-rate for each category in each city (darker = cited more). Two patterns stand out: **Use Case** (interpretation / breakouts) is the weakest column despite being Quiet Events' positioning moat, and the bottom four cities (Atlanta, DC, Dallas, Denver) are weak almost everywhere.

	Discovery	Best & Ranking	Use Case	Scale & Convention	Informational
New York, NY	62%	69%	42%	56%	44%
San Diego, CA	46%	31%	42%	56%	25%
Las Vegas, NV	33%	38%	38%	38%	38%
Orlando, FL	29%	31%	12%	62%	50%
Miami, FL	29%	44%	21%	44%	31%
Chicago, IL	21%	31%	25%	56%	31%
Atlanta, GA	21%	25%	21%	25%	19%
Washington, DC	12%	31%	17%	25%	31%
Dallas, TX	25%	44%	12%	19%	12%
Denver, CO	8%	19%	8%	6%	19%

Quiet Events citation share by city — how often we're the source

Citation share = of all the links AI actually cited in a city, the fraction that point to quietevents.com (vs competitors' sites). This is the harder, more important metric: visibility means we get *mentioned*; citation share means our *pages* are the source the AI pulls from. Overall it's just **5.6%** — competitors' city pages are the cited sources.

Watch the gap vs visibility: **New York has 54 visibility but only ~8% citation share** — AI name-drops Quiet Events but cites competitors' pages. Closing this gap is what the page rebuild (below) is for.

CITY	CITATION SHARE	QE LINKS / TOTAL	VISIBILITY (FOR CONTRAST)	DISC.	BEST	USE CASE	SCALE	INFO
San Diego, CA	7.9%	92/1165	41	5%	7%	9%	8%	11%
New York, NY	7.6%	87/1148	54	5%	11%	7%	7%	10%
Las Vegas, NV	6.6%	73/1104	36	6%	9%	6%	5%	9%
Chicago, IL	5.7%	64/1122	31	2%	5%	6%	7%	10%
Orlando, FL	5.7%	65/1140	34	4%	7%	5%	7%	7%
Miami, FL	5.5%	58/1063	32	4%	6%	5%	6%	7%
Atlanta, GA	5.0%	55/1090	22	2%	6%	6%	5%	7%
Washington, DC	4.5%	52/1151	22	1%	7%	4%	4%	8%
Dallas, TX	4.4%	48/1087	22	3%	4%	5%	4%	7%
Denver, CO	3.3%	36/1095	11	1%	3%	3%	3%	8%

Where Quiet Events sits in the field

How often each brand is **named** across all 960 answers. **Quiet Events ranks #5 of 967 brands** (324 mentions) — right behind the top four (Silent Events, Sound Off Experience, Silence Activations, HUSHconcerts).

#	BRAND	MENTIONS
1	Silent Events	617

What gets cited — and the actual links

51% of every cited URL is a location / city landing page — the city is baked into the slug. Blogs (1.2%), Reddit (0.6%) and marketplaces (0.5%) barely register; AI pulls vendor landing pages. Below: each city's top cited URLs (clickable), Quiet Events' own pages highlighted green.

Why Quiet Events appears in some cities and not others

The obvious theory — "we don't have pages for those cities" — is **wrong**. We matched the live sitemap: Quiet Events has a `/pages/{city}-{state}-silent-disco` page for **all 10 markets** (and ~90 more). The pages exist; they just don't get cited. Here's the proof:

CITY	QUIET EVENTS CITY PAGE (EXISTS — CLICK)	CITY PAGE CITED	HOMEPAGE CITED	TOP COMPETITOR PAGE
Orlando, FL	/pages/orlando-florida-silent-disco	18	20	55× silentevents
Las Vegas, NV	/pages/las-vegas-nevada-silent-disco	0	20	52× silentevents
Chicago, IL	/pages/chicago-illinois-silent-disco	5	21	54× soundoffexperience
Atlanta, GA	/pages/atlanta-georgia-silent-disco	8	18	57× soundoffexperience
San Diego, CA	/pages/san-diego-california-silent-disco	11	26	63× soundoffexperience
New York, NY	/pages/new-york-silent-disco-events	0	53	55× soundoffexperience
Washington, DC	/pages/washington-dc-silent-disco	3	15	57× soundoffexperience
Dallas, TX	/pages/dallas-texas-silent-disco	12	22	41× silentevents
Miami, FL	/pages/miami-florida-silent-disco	23	10	49× silentevents
Denver, CO	/pages/denver-colorado-silent-disco	5	9	41× hushconcerts

Red rows = the page exists but earned **0** citations. Note how Quiet Events' **homepage** out-cites its own city page in 8 of 10 markets, while the competitor's single location page pulls 41–63 citations everywhere.

So why do the pages lose? We pulled them apart.

Comparing Quiet Events' Las Vegas page (0 citations) and Miami page (23) against Silent Events' Las Vegas page (52):

SIGNAL	QUIET EVENTS CITY PAGE	SILENT EVENTS (WINNER)
Content	~988 words, near-duplicate template — Vegas and Miami are byte-for-byte identical except the city name	~1,756 words, more unique local content

SIGNAL	QUIET EVENTS CITY PAGE	SILENT EVENTS (WINNER)
Intent framing	"Silent Disco " (party). Conference keywords barely present (conference 3, convention 1, breakout 1, interpret 0)	Conference-dense (conference 10, convention 11, breakout 4)
Title	"{City} – Silent Disco – Quiet Events Silent Disco" (no "rental / headphone / conference")	"Silent Disco Headphone Rental {City}, {State}"
Meta description	Opens " No Events Yet in Your City? " — reads like nothing happens there	Commercial rental intent
Schema	Organization, Image, Video only — no LocalBusiness / Service / FAQ / Breadcrumb	WebPage, Breadcrumb, SearchAction, ...
AI sitemap	Their <code>sitemap_agentic_discovery.xml</code> lists one file — <code>agents.md</code> (Shop.app checkout instructions) — not the city/conference pages	—

The mechanism: because the city pages are thin, near-duplicate, and disco-framed, AI discounts them and falls back to Quiet Events' stronger homepage — while the competitor's longer, conference-keyword-dense, keyword-titled location pages win the citation. Miami and Orlando happen to clear the bar; Vegas and New York's identical pages clear nothing (0). **It's a page-quality and intent problem, not a page-existence problem.**

What to do — rebuild each city page as a local silent-events hub

The pages feel weak because they're thin, near-duplicate templates pointed at one use case. The highest-leverage fix isn't to narrow them to conferences — it's to turn each into a genuine **{city} hub** that covers every way Quiet Events serves that market: **public events & tickets, rentals (weddings / parties / fitness), and conferences**. One deep, unique page wins rental, event *and* conference queries at once, where a thin page wins none — and it finally gives each city page real, non-duplicate content.

Recommended city-page blueprint

Each city page should lead with the local angle, then layer the service sections. Sections double as the headings AI extracts.

SECTION	WHAT IT COVERS (MADE SPECIFIC TO THE CITY)	QUERIES IT CAPTURES
1. Silent events & tickets near {city}	Upcoming / recurring public silent parties, ticket links, recent event photos & recaps in {city}	"silent disco {city}", "silent disco events / parties near me", "things to do in {city}"
2. Silent disco rentals in {city}	Weddings, private parties, fitness & wellness, schools, festivals — headphone styles & inventory available locally	"silent disco rental {city}", "wedding silent disco {city}", "rent silent disco headphones {city}"
3. Silent conferences & corporate in {city}	Breakout sessions, simultaneous interpretation, 500+ attendees, named convention centers (the gap from this audit)	the silent-conference prompts Quiet Events is losing today
4. Pricing, inventory & local proof	Rate card, no-deposit guarantee, real {city} deployments & venues served, fleet depth	"silent disco cost {city}", "best silent disco company {city}"
5. {city} FAQ	5–8 city-specific Q&As (venues, permits, delivery radius, power/Wi-Fi)	long-tail questions + FAQ rich-results / AEO

The technical must-dos that make it actually get cited

1. **Make every section genuinely unique per city** — real venues, real local events, real numbers. The core problem today is byte-for-byte duplication (Las Vegas = Miami verbatim). Aim past ~1,500 words of distinct content.
2. **Tune the title + meta to the hub, not "disco" alone** — e.g. *"Silent Disco in {city} — Events, Rentals & Conferences / Quiet Events"*. Kill the "No Events Yet in Your City?" meta description.
3. **Add structured data per page:** LocalBusiness + Service + Event + FAQPage (today the pages carry Organization / Image / Video only).
4. **Link & surface them:** internal links from the homepage and the service hubs, and add the city pages to the AI sitemap (today `sitemap_agentic_discovery.xml` lists only `agents.md`).
5. **Roll out by need:** start with the two zero-cite markets — **Las Vegas & New York** — then the weak cluster (Washington DC, Denver, Chicago, Atlanta). Re-run this audit monthly (the 10 reports already exist) and track own-site citation share from **5.6% → 15–20%**.
